CosTherm® A.550

Product Description:
cosTherm® A.550 is a very light insulation plate with an outstanding insulation effect and a high long-term temperature resistance.

Additional technical information is available upon request.

Delivery forms:

- Standard size: 1000 x 600 mm
- Standard thicknesses: 5 - 30 mm

We deliver plates, pre-cut parts and machined parts according to drawings.

Application:
cosTherm® A.550 is mainly used as insulation at heated moulds, tools, presses or machines for applications with low compressive load. We gladly advise you on your specific application.

The data specified are reference values and have been determined according to accepted test methods. They can be modified or updated during further developments and are not contract data. Issue 03/2020.
